EDITORIAL

The Proceedings of the Institute of Phonetic Sciences (Instituut voor Fonetische Wetenschappen Amsterdam, shortly IFA) is an annual world-wide distributed, publication, intended to provide up-to-date information on current research projects of the institute. IFA belongs to the Faculty of Humanities of the University of Amsterdam.

IFA Proceedings 23 presents, apart from four full papers (Van As, Boersma, Koopmans-van Beinum, Weenink), three papers based on Master's theses finished in 1999 (Kiestra, Ölander, Rog) and two summaries of recently defended Ph.D. theses of post-graduate students (Van Donzel, Jansonius-Schultheiss).

For your information a list of personnel of the Institute of Phonetic Sciences is included, as well as a list of publications in 1998 and 1999.

The contents of IFA Proceedings 23 can also be found on IFA’s website. The website also supplies other information including that about the computer program Praat, a research, publication and productivity tool for phoneticians.

Apart from the Proceedings, IFA Profile 2000 is available, giving an overview of IFA’s teaching programs, technical facilities, and short descriptions of all ongoing research projects. IFA Profile 2000 can also be found on the website.

All correspondence, including requests to be put on a mailing list to receive the annual IFA Proceedings, can be directed to:
